WORK EXPERIENCE

February 2021 – To Date

DENEGOTIATORS HOUSE AGENCY

Nakuru, Kenya

Software Developer (Full-Time)

- I designed and developed an e-commerce front-end website with advanced user experience resulting in 25% increase in client reach-out.
- Debugged the project and tested the application using Continuous Integrated pipelines resulting in bug fixation thereby improving performance.
- Documented the Software to enable both the client and other developers understand and operate with ease.
- Collaborated with the Product manager to understand and upgrade business specifications on the website, based on analysis reports collected from users.
- Currently I'm upgrading the website using Front-end libraries such as React.js, React Hooks and other web related technologies to improve the performance and user experience.

March 2020 – December 2020

LEXUS DRIVING SCHOOL BUSIA

Busia, Kenya

Web Developer (Freelancer)

- Introduced Software Development solution to the company by designing UI and developing an e-commerce website with an aim of solving the company's marketing problem.
- Reorganized and improved code inefficiencies, which reduced bugs and increased website's performance and efficiency.
- Created an API capable of collecting user's feedback or queries and emailing them to the company's Mail inbox.
- Documented detailed, technical documentation of the software used for orienting employees and presenting to prospective clients thereby making it easier for any user or client to fit right in.

March 2018 – November 2019

DECO IMPACT COMPUTERS

Busia, Kenya

IT Technician

- I applied for KRA PINs, Filed returns, processed Good Conduct, Typeset, Printed documents, Photocopied, processed P9 and Payslips forms etcetera.
- Under an instructor's supervision, I repaired computers, installed Windows OS, networked on Internet connection and so on.
- Got to learn a lot of things gaining wide experience and exposure in the IT industry.
